YANA TEHLIVETS

QA ENGINEER

I am a person who loves quality in every part of my life. I like to deliver quality solutions to people by my work. That's why I worked as a freelancer florist on weddings for 6 years. In pandemic time it was hard to give a good quality of my service. There for I started looking for an area where I could be realized. I found and now I want to pass a way from a manual tester to high level QA engineer and business analyst or product owner in the future.
Of course I have mentor - my husband is a developer, who is directing and supporting me.
